All-Natural Organic Stretch Cotton Cover

All-Natural Wool Liner For Breathability

All-Natural Latex Foam Cushioning

Independent, Flexible Pocketed Steel Coils

Solid Wood Slat Box Foundation

Affordable, high-quality sleep systems free from harmful chemicals—for the whole family.

Our ES mattresses provide a good night's sleep at an economical price. They are available in three models: the Euro Medium, the Areus ES, or the 6" Latex. The Euro Medium is a combination of natural latex foam with a base of pocketed steel coils. It is a firmer style of mattress that has excellent support. The Areus ES is a simpler version of our Areus mattress, and has a softer feel than the Euro Medium. The Areus ES has a 2" top layer of natural latex foam in two firmness options atop a base layer of carbon steel coils. The 6" Latex is a single, thick layer of Dunlop-processed latex foam and is available in two firmness options. It has a denser feel than the other ES mattress styles.

Unlike other economically-priced mattresses, the ES line does not sacrifice quality for value. We use only premium materials: our cushioning is 100% natural latex foam, not polyurethane. Our high carbon steel coils have flexibility and strength, with many more coils than most budget mattresses. Our mattress cover is made of stretch organic cotton knit quilted to merino wool for breathability. We also provide an economical solid wood slat box foundation for a supportive mattress base. And like our standard line, the ES mattresses do not contain harmful chemicals or flame retardants. The ES mattresses are made only of fibers and fabric certified to be clean and safe by Oeko-Tex of Europe. It all adds up to a series of mattresses that are comfortable and durable as well as affordable.
