

The SC41 Ergonomic Mattress System

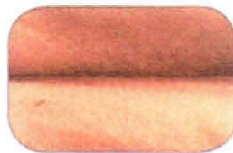

Designed to feel better, last longer, and sleep deeper

- * Ecologically healthy components, built to last
- * Designed for optimum support and pressure reduction
- * Designed to aid in optimal breathing and posture
- * Multiple styles and firmnesses - dual-sided for couples
- * Eliminates roll-together and center-sag
- * Quiet and stable - no side-to-side motion or bounce

All-Natural Organic
Stretch Cotton Cover

All-Natural Wool
Liner For Breathability

All-Natural Latex
Cushioning

Independent, Flexible
Carbon Steel Coils

Flexible, Adjustable
Slat Suspension Base

Engineered for deeper sleep

At SC41, we have a practical approach to mattresses.

We hand-pick the purest and most durable components and build our own product in a full range of style and firmness options. This approach means that you get a high performance mattress at a lower cost. Our mattresses are built to perform well, providing comfort, support, and durability. And our trained staff are here to guide you in selecting the mattress that's just right for you. At SC41, we've done the research for you, so you can shop smart and rest easy.

Health, comfort, and value

We believe that a well-built mattress provides health, comfort, and value. At SC41, we build our product with the finest eco-certified components- natural foam and carbon-steel independent coils, covered in organic stretch cotton quilted to wool. All of our mattress components are ecologically certified by OekoTex, a European environmental testing board that tests bedding products for chemical content. These natural materials are also more elastic, enabling the mattress to conform to your body's curves for pressure reduction. The result? A high quality mattress that delivers comfort and durability at a fair price.

Alignment and breathing: the science of sleep

The quality of your sleep greatly affects your quality of life. At SC41, we consider every factor that can aid or impede sleep. Our mattresses yield to conform to your body. This reduces pressure on your shoulders and hips, enabling you to attain a neutral sleep posture for deeper breathing and more restful sleep. Our mattresses are breathable, allowing your perspiration to evaporate while you sleep, lowering your body temperature and reducing your heart rate. Paired with our natural and organic bedding and our supportive and comfortable Oxygen Pillow, the SC41 sleep system creates the optimal sleep environment.
