

# Nobella

- Two layers of high-grade German coils—a total of 1,500 micro coils over 1,370 base coils
- 100% natural latex for a soft and flexible surface feel
- Breathable wool-lined cotton cover for cool, dry sleep
- Four firmnesses to choose from—dual-sided for couples
- Ecologically healthy components, built to last

All-Natural Organic Stretch Cotton Cover

All-Natural Wool Liner For Breathability

All-Natural Latex Cushioning

Independent, Flexible Carbon Steel Coils

Flexible, Adjustable Slat Suspension Base

## The ultimate in comfort—gentle yet supportive

You don't have to sacrifice support for a soft feel. Our Nobella mattress gives you the plush softness of a luxury pillow top mattress without the sag. At the surface of the Nobella is a layer of specially designed micro-coils, which gently contour and yield to your body's curves. A second layer of coils in the base cradles and supports your weight. Together, these coil layers create a plush, gentle yet supportive feeling mattress. Made from natural, breathable materials and independent coils, the Nobella provides a dry, motionless, luxurious sleep environment.

## Maximum support with minimum pressure

Our Nobella mattress achieves its soft, luxurious feel from a double layer of flexible, durable, carbon-steel coils—not from inferior cushioning materials. Over 2,800 independent base and micro-coils do a superior job of conforming to your body's curves while supporting your body's weight. Natural latex cushioning at the surface and an organic stretch cotton cover reduce surface tension and pressure and allow your body to gently flex deeper into the mattress surface. Lined with wool for a naturally drier sleep environment, the Nobella is fully eco-certified to be free of hazardous chemicals and off gassing. We offer you four firmness options, including a dual firmness for couples. Our Nobella mattress is a healthy, durable mattress with an enveloping, plush, and supportive feel.
