

Nobella II

- Two layers of high-grade German coils—a total of 1,500 micro coils over 1,370 base coils
- Natural latex foam for a soft and flexible surface feel
- Breathable wool-lined cotton cover for cool, dry sleep
- Four firmnesses to choose from—dual-sided for couples
- Ecologically healthy components, built to last

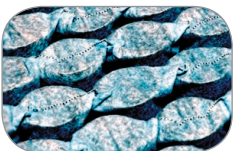

All-Natural Organic Stretch Cotton Cover

All-Natural Wool Liner For Breathability

All-Natural Latex Foam Cushioning

Independent, Flexible Carbon Steel Coils

Flexible, Adjustable Slat Suspension Base

Firm yet flexible support

We created our Nobella II for customers who like a plush, luxurious feel but also want a more substantial, denser-feeling mattress. The Nobella II surface contours to the body while remaining firm, thanks to a top layer of pre-compressed coils that flex independently to the shape of the body. And the micro-coil is topped with natural latex cushioning. This creates a uniquely supportive feel and firmness free from the flat hardness and surface tension of most conventional mattresses.

A solid feel with superior contouring

The 1,500 pre-compressed micro-coils in the Nobella II are uniquely designed to support your body's weight. This pre-compression enables the coils to contour to your body's curves more tightly, resulting in a firm, dense feel. A layer of 1,370 base coils maintains the support, and all coils are completely independent and flex without bounce or motion transfer. The Nobella II comes with a breathable organic stretch cotton cover lined with wool to keep you cool and dry, and its components are certified chemical-free for a healthier sleep. Choose from four firmness options with a dual firmness option for couples. In this mattress, you'll discover the luxurious contour of our Nobella combined with the denser, firmer feel that is unique to our Nobella II.
